

CLACKAMAS RIVER WATER PROJECT FACT SHEET

HATTAN ROAD TRANSMISSION MAIN AND PUMP STATION

Project Details

The Hattan Road Transmission Main and Pump Station projects are part of Clackamas River Water's (CRW) "Backbone Projects" to improve water distribution and storage. This project will build a pump station and 18-inch diameter water transmission main on Hattan Road from Gronlund Road to approximately 16541 S. Hattan Road, where it will follow a waterline easement west of Hattan Road up the hill to our Redland Reservoir site.

Benefits

This project will replace outdated and undersized cast iron waterlines, and will greatly improve water transmission efficiency and capacity to our south service areas.

What to Expect

Time of Day

Work will be conducted primarily Monday – Friday, 7:00 a.m. – 5:00 p.m. For Estimated Construction Schedule, see back of this page.

Construction Activities

While the pump station project will be built on CRW/private property, the waterline project will require temporary excavation of roadway. Construction activities will produce temporary noise, dust, and traffic restrictions. During daily work, there will be open trenches and equipment in the area. Flaggers, construction barriers, and signs will be posted for your safety. This is a large waterline construction project that will require major excavation and related equipment such as large dump trucks, excavators, and compactors. Areas of Hattan Road disturbed by construction will be repaved.

Traffic

All work will be conducted in accordance with a County-issued utility placement permit. There will be minor delays (up to 20 minutes) and temporary lane restrictions/single-lane closures on sections of Hattan Road and related intersections. Signs will be placed on Hattan Road several weeks before construction starts advising motorists of the project and to seek alternate routes if desired.

ADDITIONAL INFORMATION ON REVERSE SIDE

CLACKAMAS RIVER WATER PROJECT FACT SHEET

HATTAN ROAD TRANSMISSION MAIN AND PUMP STATION

Estimated Schedule

**Waterline
Construction**
December
2018-July 2019

**Pump Station
Construction:**
November
2018- August
2019

**Intermittent
Water Service
Interruptions***
January-
August 2019

** These interruptions are required to transfer CRW customers' water service to the new water main and will generally be between four and eight hours long. CRW customers will receive several days' notice prior to any shutdowns.*
